

HYDROWET

Product description:

HydroWet is a concentrated surface active agent of sodium dodecyl benzene sulphonic acid specially formulated to improve the effectiveness of water droplet contact by reducing surface tension. It is a water treatment product that can be used on temporary roads or materials handling transfer points to improve the wetting of exposed surfaces and material. It can also be used as a pre-wetting agent to improve the penetration of more permanent dust suppression products.

Application Details:

HydroWet is delivered in a concentrated liquid form ready to use. It is diluted in the water cart at a concentration of 500ppm – 1000ppm.

Benefits:

- Reduced water usage.
- Improved wetting of surfaces and materials.
- Improved penetration of more permanent dust control products.
- Easy to apply, no specialised equipment required.
- Environmentally friendly, non-toxic and non-hazardous.

Physical and Chemical Properties:

Appearance	Pale yellow liquid
Odour	low to mild
pH (2% solution)	6.0 – 8.0
Quick cool cloud point	below 5°C

Package Information:

Hydrowet is available in 1,000 litre IBCs.
